

Can Environment Compliment Your Business?

Session By: Mr. Prashant P Kokil.

**Division Head
ESDD & AUDITING,
(A vertical of M/s Eco Ventures Pvt Ltd.)**

**At Chem Expo India 2024
Bulk, Fine & Specialty Chemicals Exhibition
Bombay Exhibition Centre, Mumbai**

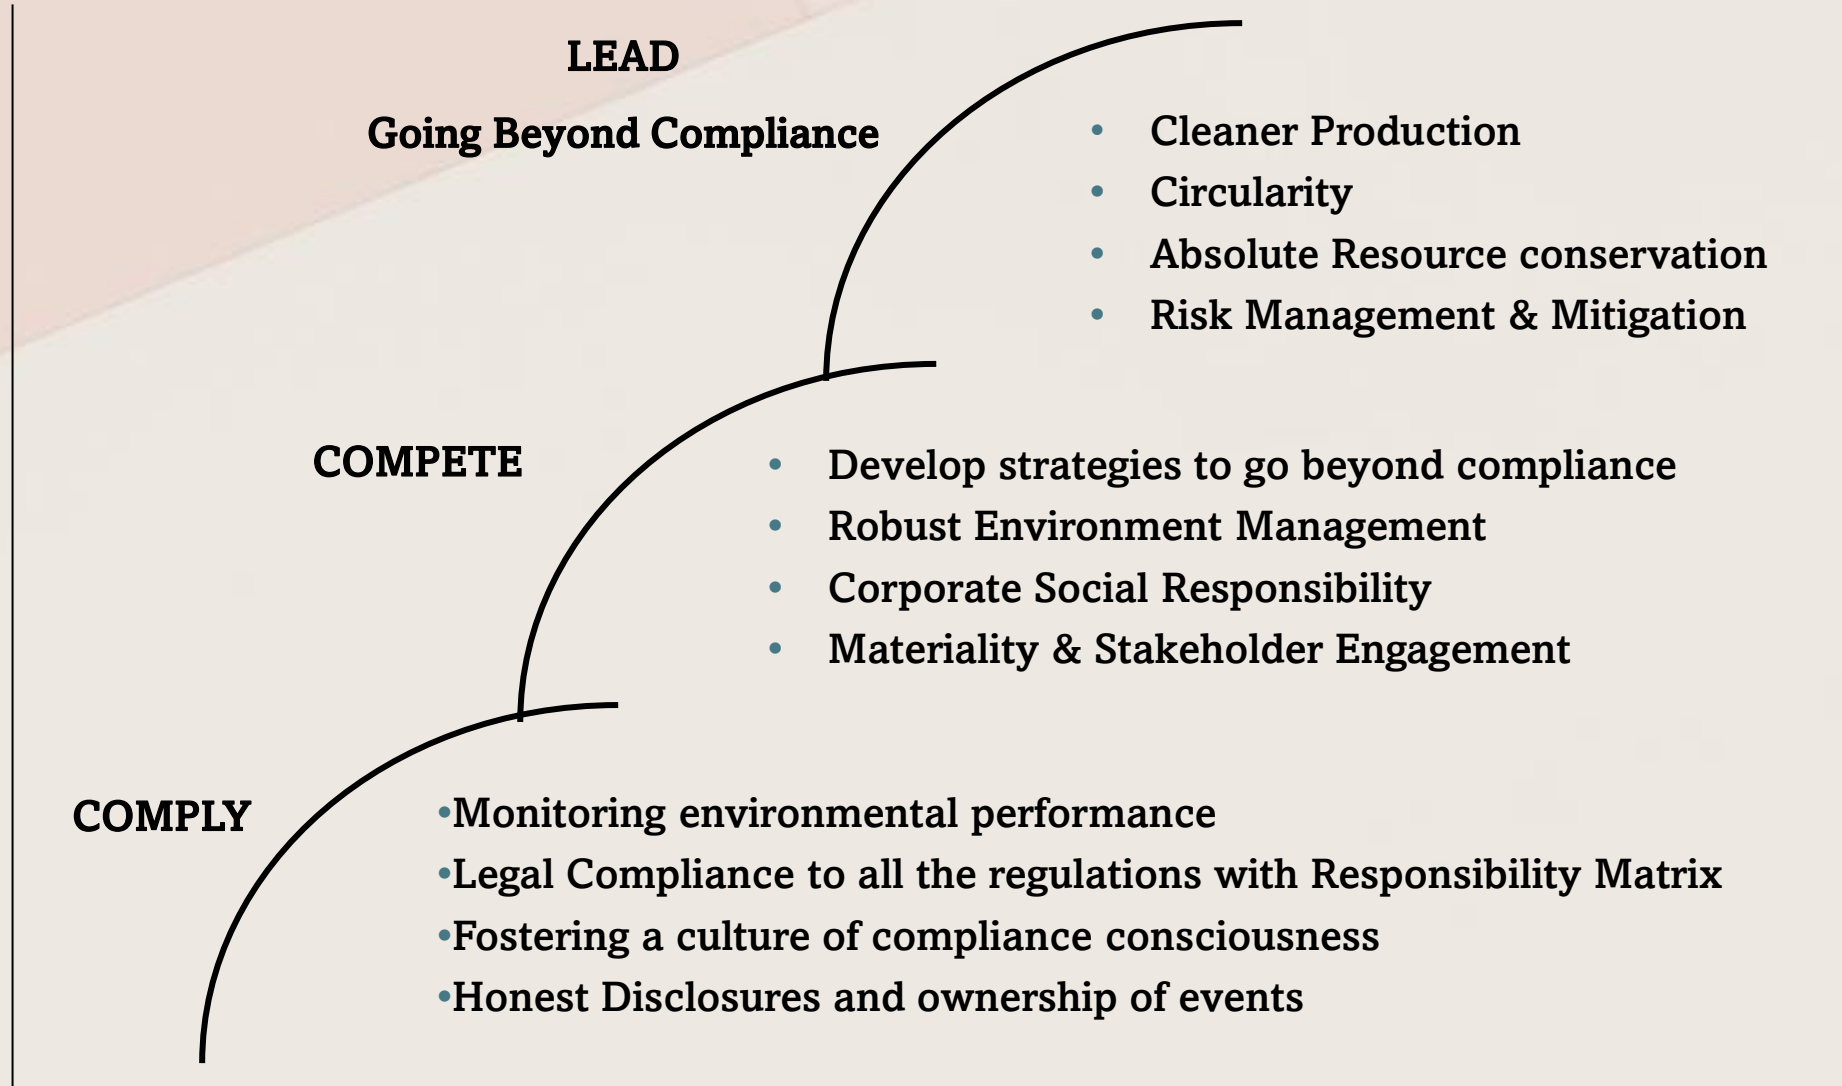

Date: 25th April 2024

The challenges faced by India's Chemical Industry

- Traditionally, Environment means Consents, Environment Clearances, State Pollution Control Boards (SPCB) etc.
- In Reality, Environment includes Your Place, Your Neighborhood, Various Authorities overseeing Compliances to different Acts, Rules, Regulations.
- Starting Point for any company is always “Legal Compliance”
- **WHY??** Not knowing the law is not acceptable excuse for Non-Compliances.

HOW?

By simply following this *CURVE* of **COMPLY, COMPETE, LEAD.**

**Instead of getting stuck on
compliances, can we raise ourselves to
go**

“Beyond Compliance”

**A Business can succeed only if it has
presence in all THREE Curves.**

What are the Challenges?

1. Assured Compliances to Regulations.
2. Avoiding Informed Litigations.
3. Being Ahead of Competitions.
4. Meeting Process Expectations & Quality.
5. Vendor Rating.

The Showstoppers!!

- 1. Compensation.**
- 2. Cost of Remediation & Restoration.**
- 3. Penalty.**
- 4. Quality of Product.**
- 5. Extended Producer Responsibility (EPR).**
- 6. Short & Long Exposure Related Health Issues.**

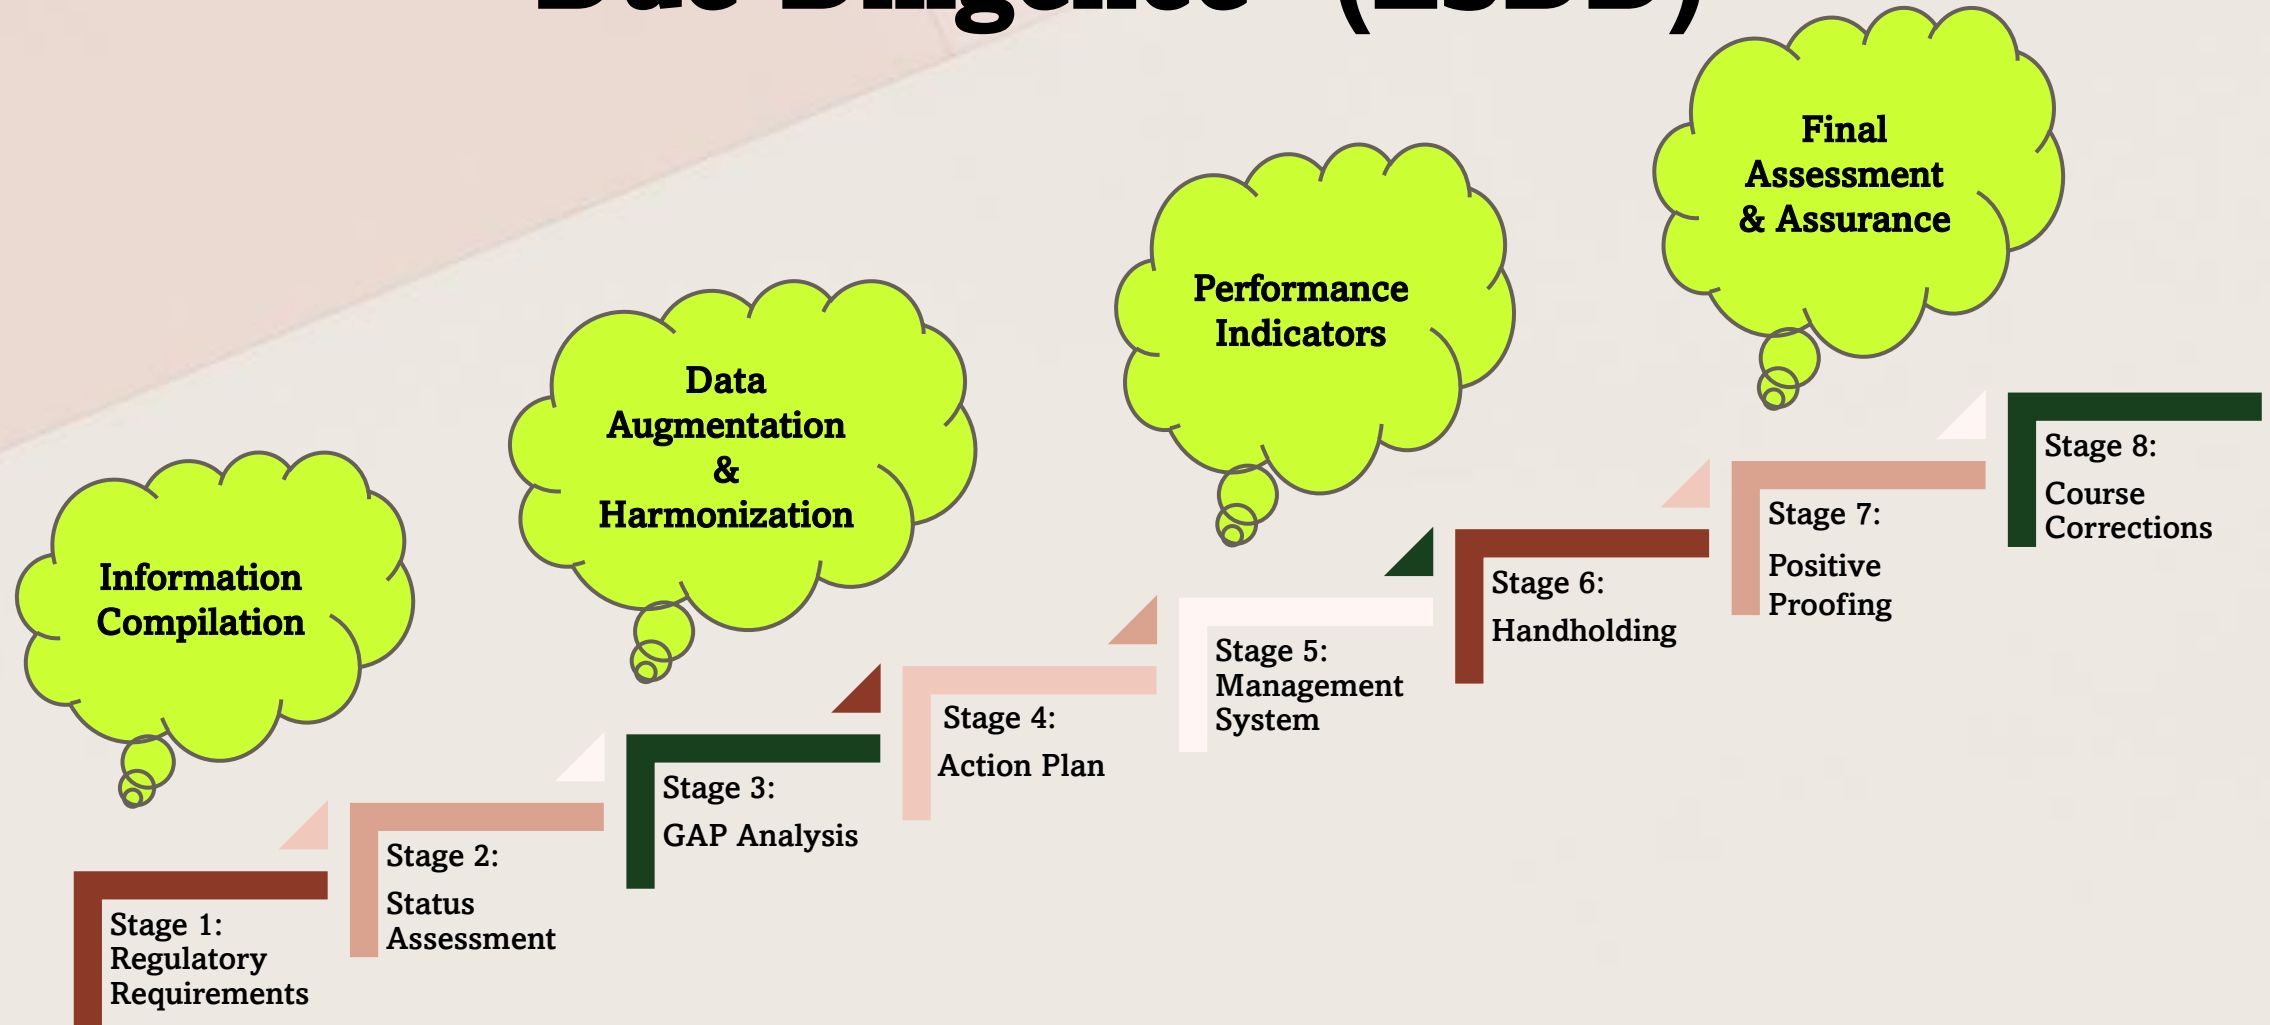

How do we contribute !

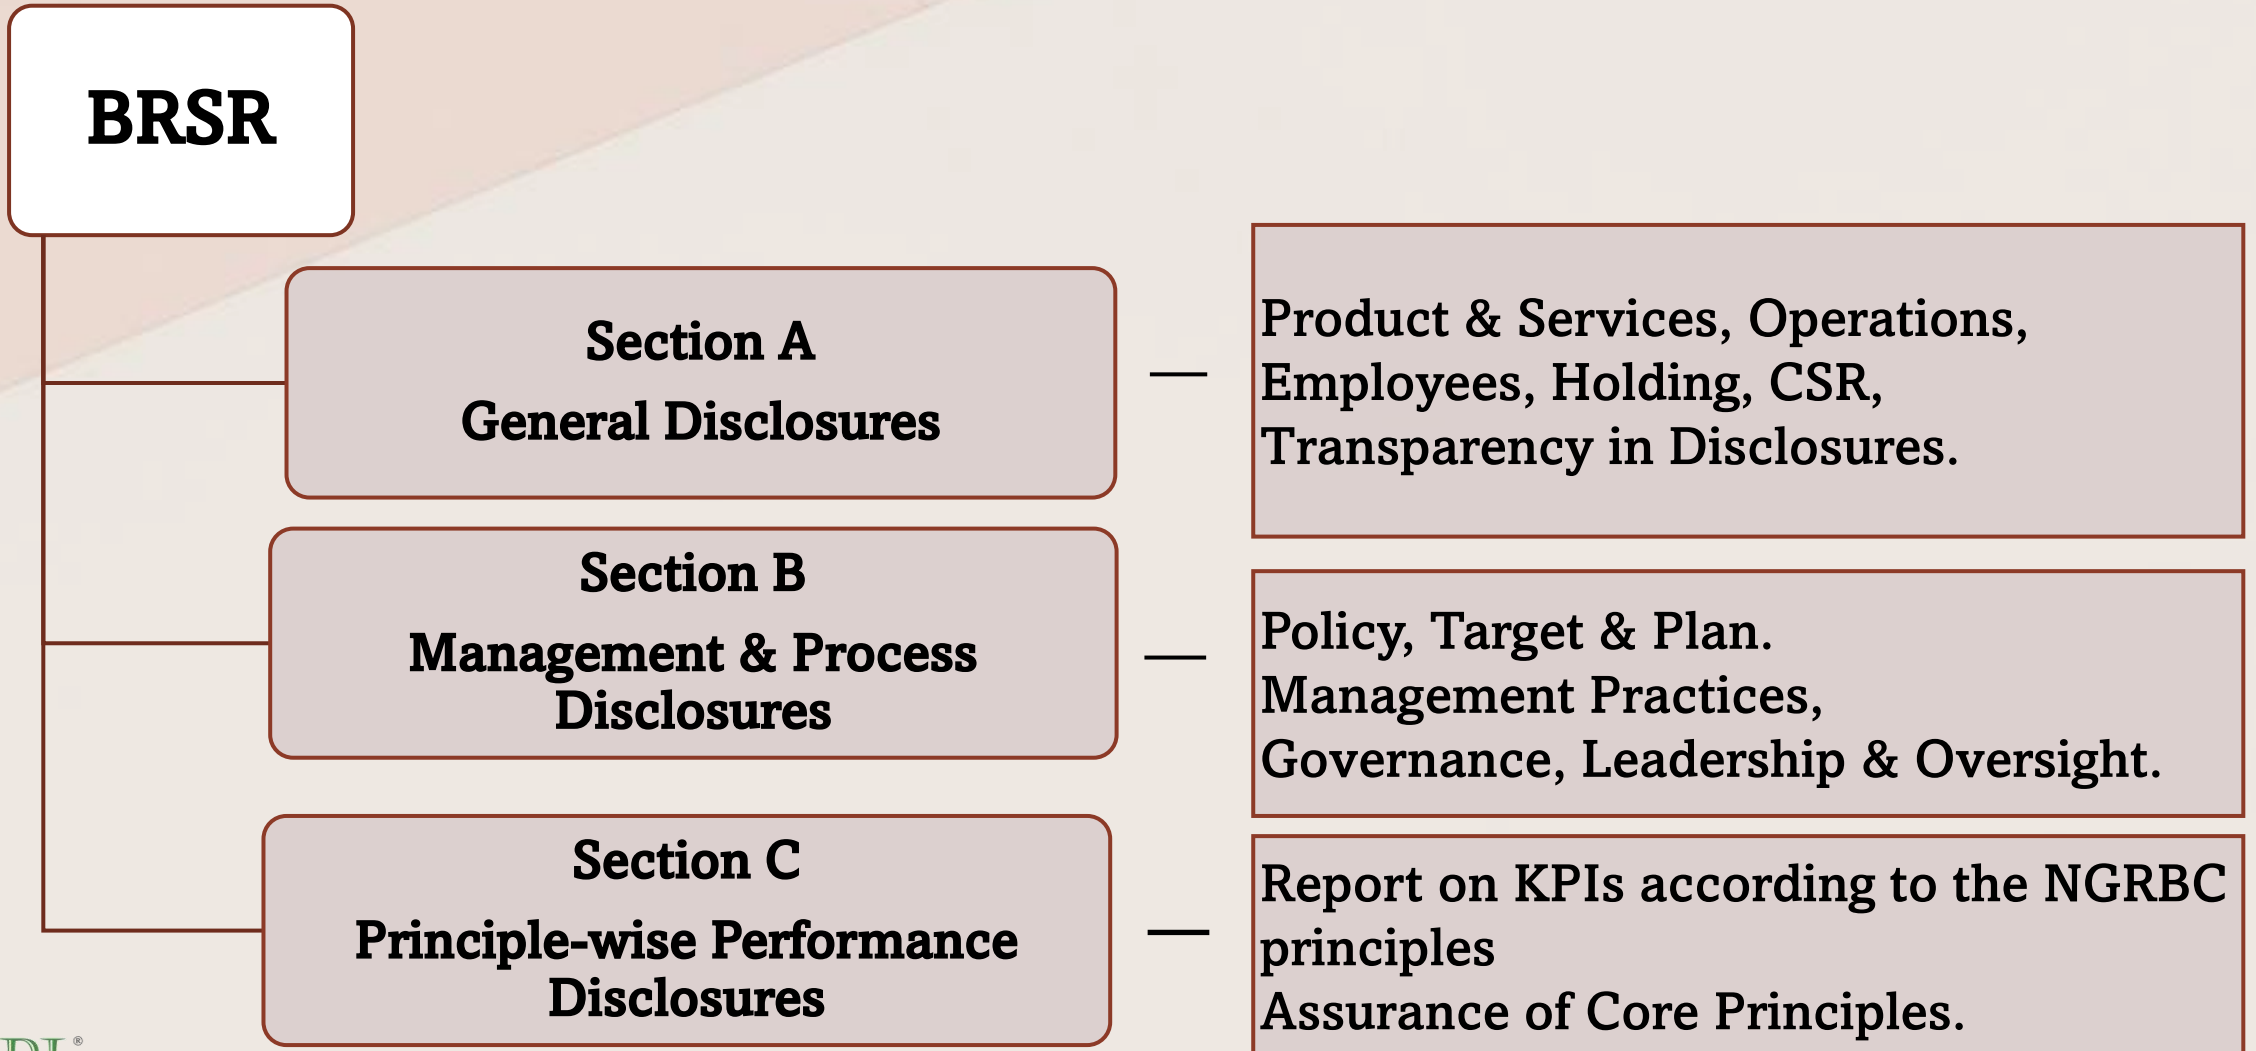

We are into Implementation of “ESG”

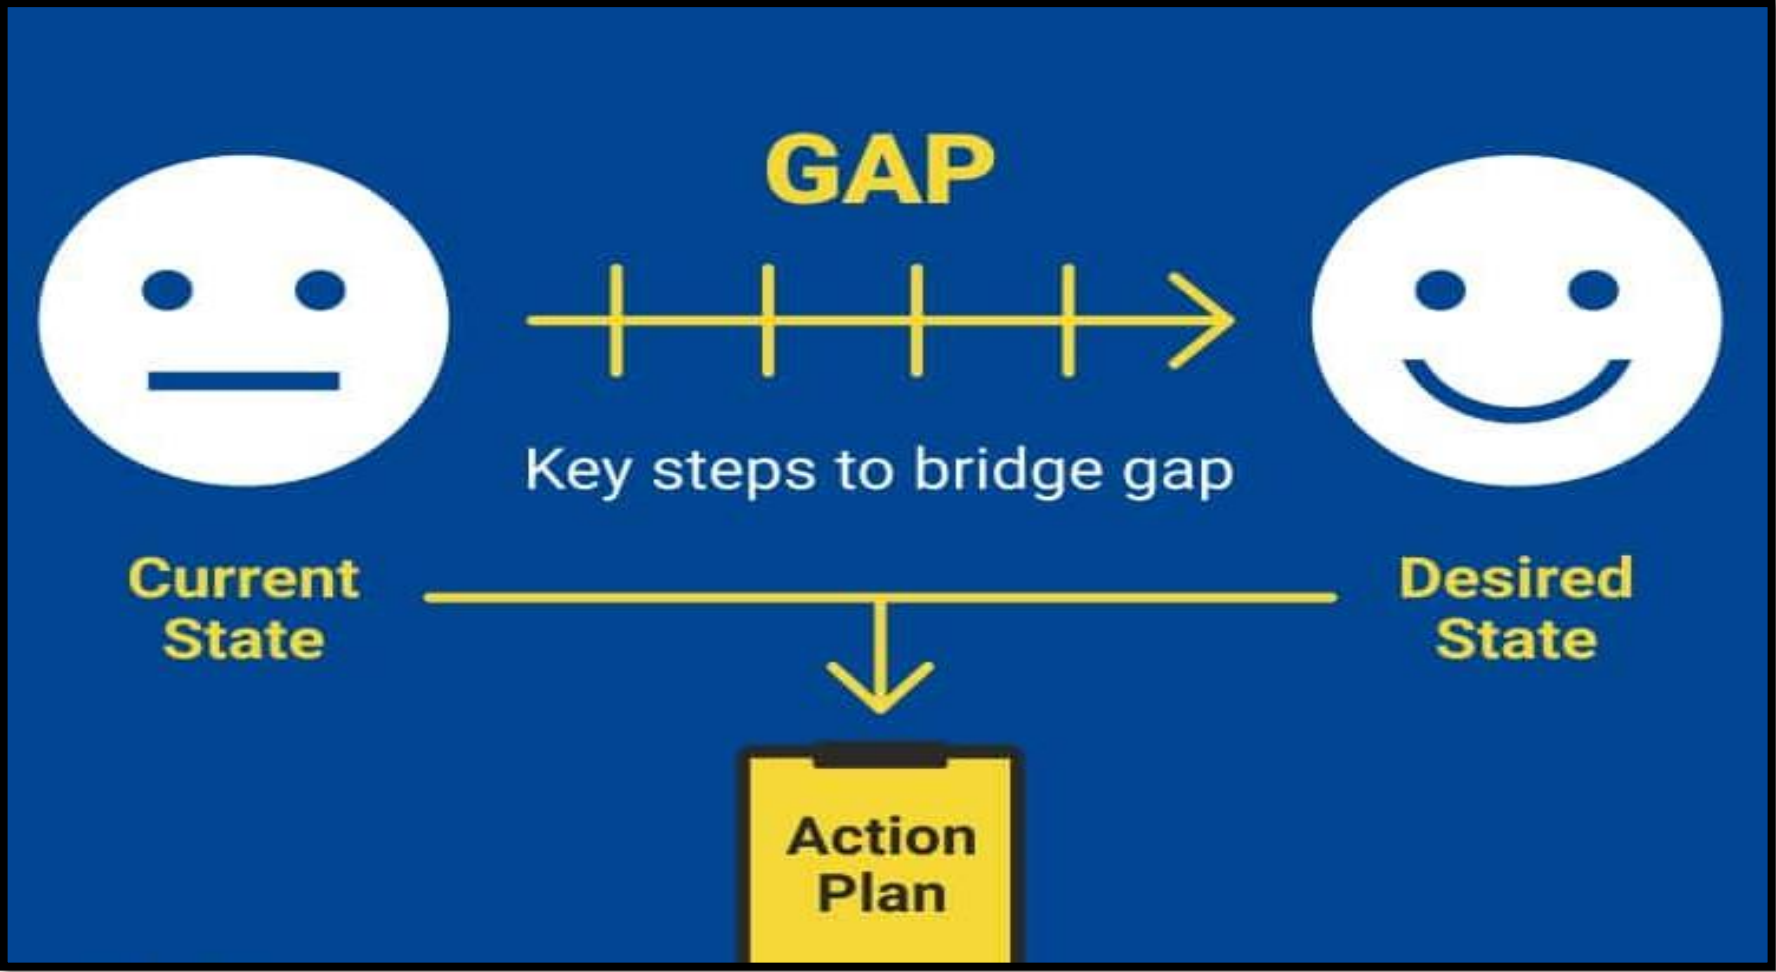

We are into executing “Environment Social Due-Diligence” (ESDD)

We are into Business Responsibility and Sustainability Reporting (BRSR)

We are a “Need-Gap Analyst”
